

HAMPTON, PHOEBUS AND OLD POINT--Continued.

MARKET WAS FEVERISH;
THE LIST UNSETTLED

Prices of Stocks Were Up and
Down and Professional Were
Kept Guessing.

UNION PACIFIC WAS THE BOOSTER

It Was Used in Effort to Raise
Prices, But Weakness in All Metals
Made the Consumption of the Plan
Impermissible—Total Sales and Clos-
ing Quotations.

NEW YORK, July 17.—Prices of stocks were up and down all today and the movement became feverish late in the day with the quick transition from rising to falling tendencies. Dealings were not on an important scale outside of a very few issues. It was the conflicting movement of the most conspicuous of these that kept the list unsettled. Union Pacific was the prominent influence on the advance and United States Steel on the side of the decline, the weakness of the latter overwhelming the late market.

The demand for Union Pacific was persistent and determined and that stock was generally regarded as the center of organized operators to support the market or to advance prices. The desire to make an attractive market for the convertible bonds of which \$71,000,000 out of \$75,000,000 has fallen to the underwriting syndicate, was one of the evoked motives for the support of Union Pacific. The wide decline in the price of copper after being long arbitrarily held at about 25 cents is an example that entered into the situation and the fact that the metal markets are declining is an additional factor. The copper stocks were weak in company with U. S. Steel today. In spite of a violent rebound in price of copper warrants in London.

There was very little change in the money market, although foreign exchange rose. Monday's payment of \$14,000,000 on account of Union Pacific convertible bonds and Wednesday's of \$10,000,000 for American Telephone stock are requirements to be met in the early future. The June foreign trade statement indicates a heavy increase in manufactured exports for the month compared with June of last year, which is sufficient to more than offset the heavy growth in value of imports for the same period. The acute weakness in United States Steel made the closing weak and disorderly at sharp losses.

Bonds were irregular. Total sales par value \$890,000. U. S. Bonds were unchanged on call. Total sales today 602,200 shares, including Copper 46,500; American Cotton Oil 100; Sugar 200; Tobacco 500; A. C. L. 200; C. & O. 700; L. & N. 200; N. & W. 200; Reading 78,100; So. Ry. 200; do. pfd 200; U. P. 173,400; U. S. Steel 61,100; Va. Car Chem 100; Nor. Pac. 37,100.

NEW YORK, July 17.—Money on call easy; 2 1/2 to 3 1/2 per cent; ruling rate 3; closing bid, 3; offered at 3. Time loans dull and steady; 60 days 1 1/2 to 5 per cent and 90 days 5 to 5 1/2; six months 6 per cent. Close: Prime mercantile paper 5 1/2 to 6. Sterling exchange firmer with actual business in bankers' bill at 48.85 to 48.90 for demand and at 48.50 for 30 day bills. Posted rates 48 1/2 to 48 3/4. Commercial bills 48 1/2 to 48 3/4. Mexican dollars 52 1/2 to 53. Government bonds steady. Railroad bonds irregular.

BALTIMORE, MD., July 17.—Flour—Wheat—dull; spot contract 91 to 94; Southern by sample 63 to 88. Corn—dull; spot mixed 59 1/2 to 64; white 59 1/2 to 64. Southern white corn 59 1/2 to 64. Oats—easier; No. 2 mixed 49 to 52. Rye—quiet. Butter—firm, unchanged, fancy imitation 22 to 24; do. creamery 27; do. lard 21; store packed 17 to 18. Eggs—steady, unchanged, 17 to 17 1/2. Cheese—active and strong, unchanged, large 15; medium 15 1/2 to 16. Sugar—steady; coarse granulated 5 1/2; fine 5 1/2.

BEGGARS ON VESUVIUS.

Rich Harvest Reaped from Tourists Following Last Year's Eruption.

Since the last eruption of Mount Vesuvius the volcano has been extremely profitable to the beggars that infest Naples and its vicinity. They are fleeing the visitors to Boscorease and Ottajano, the two places laid waste by the lava flow last year.

Huddled in groups which might have been posed by a skillful stage manager, the population of Boscorease awaits the arrival of the strange cars. Men, women and children shrieking and howling, begin to depict the terrors of the catastrophe of 1906.

Emotional women are moved and immediately contribute. Those who do not give freely are so beset by the weeping and complaining natives that they are finally convinced that it would be heartless not to help those who have suffered so deeply. Every day the beggars make a highly profitable haul in spite of the fact that not one of them ever lived or was at Boscorease until after the eruption.

At Ottajano the same appeal is made to the sympathies of the visitors and often by the same impostors. Here the beggars have made a sort of gypsy camp where they cook beans in the hot lava and lead sentimental visitors to talk with an old man.

Seated on a block of lava with the wind blowing through his long white locks and beard, he stares in front of him.

"This old man was very rich," says the chief of the beggars. "His house, his fields, his fortune lay under this lava. Worse of all his suffering was to see his wife swept alive under the flowing lava."

At these words all the beggars begin to howl and weep. Many of the visitors contribute liberally to the fund that soon accumulates in the old man's open palm. Some return to Naples profoundly touched by the sight.

They would be consoled by the fact, did they but know it, that not a person was killed at the eruption last year either in Boscorease or in Ottajano. The beggars are nevertheless earning a fortune out of sympathetic travelers who journey there to see the lava fields.

A Corporation Style.

The Lawyer's Wife—What does the paper say about the styles?

The Lawyer (absently)—Large checks will be the correct thing in law suits this season.—York Dispatch.

PASTEURIZATION OF MILK

Health Authorities Do Not
Believe That It Kills All
Disease Germs.

It is said that no dealer can afford the trouble and expense of complete pasteurization says the Metropolitan Magazine. The process as sometimes employed consist in subjecting the milk to about 170 degrees of heat for perhaps half a minute. This operation serves to kill the souring germs or bacteria which produce sour milk, but does not necessarily kill the disease germs. It is the commonest of fallacies to suppose that it kills all these germs or thoroughly purified the milk. The weaker pathological germs are destroyed, leaving many of the stronger to multiply the better. Moreover, certain germs breed much faster in the milk after the hurried process, and it is for these reasons, and not because of the great expense, that the health board has been so slow to accede to the public demand for pasteurization. Since it is an axiom that perfectly good milk does not need to be pasteurized, why, then should the dealer resort to the process? It is done for a variety of reasons, all calculated to swell the contents of the dealer's pocket. Milk subjected to the process is often of a poorer quality. It may be several days old or it may be part of the surplus from the day before that would otherwise pour on his hands at a dead loss. There is also a simple case of customer who will not buy milk unless the cream belt shows clear at the top. To the careless pasteurizer this customer is a lamb, because the process causes the cream to rise at once. On ordinary milk the cream will not rise for some time, and the ignorant will nine times out of ten pass this by to buy an inferior and older bottle, which is precisely what the dealer intends he shall do. There is magic in the name to the ears of a layman, and he cheerfully pays a round sum for the article. He imagines that it is absolutely pure, and that it is quite unnecessary to take any special precautions in keeping it. While the souring germs are killed, the germs of putrefaction are less affected, and in the absence of the warning sourer thrive actively and fearlessly. Last year 5,887 children of two years and under died of enteritis and diarrhea, the result of improper diet.

It is the belief of those who have investigated the matter that improperly pasteurized milk played no small part in this large mortality.

The secret of wholesome milk lies in perfect cleanliness from the time it leaves the udder until it is delivered to the consumer. If it is clean it will keep perfectly if properly cooled. Unclean milk is the result of unclean handling, which is born of ignorance or indifference, the worst enemies of the milk police. The use of impure well water for washing cans is another serious danger. Once the farmer can be educated or clubbed into observing moderate precautions, the other evils will fall obediently into line.

Dying Words.

The dying words most quoted in the present day are those which were spoken by Stonewall Jackson: "Let us cross over the river and rest under the shade of the trees." A biographer says: "Was Jackson's soul wandering back in dreams to the river of his beloved valley, the Shenandoah (the river of sparkling waters), whose verdant meads and groves he had redempted from the invader, and across whose floods he had so often won his passage through the tolls of battle? Or was he reaching forward across the River of Death, to the golden streets of the Celestial City, and the trees whose leaves are for the healing of the nations? It was to these that God was bringing him, through his last battle and victory, and under their shade he walked, with the blessed company of the redeemed."

When the heroic Marshall Ney, the "brave of the brave" stood up before a detachment of soldiers in the garden of Luxembourg, by whom he was to be shot, one of the officers approached him to hand him his eyes. The intrepid Ney replied him, saying: "Are you ignorant that for twenty-five years I have been accustomed to face both ball and bullet?" It is related that he then lifted his hat above his head and with the same calm voice that had steadied his columns so frequently in the rear and tumult of battle, said: "I declare, before God and man, that I never betrayed my country; may my death render her happy. Vive la France!" He then turned to the soldiers, and striking his hand on his heart, gave the order: "Soldiers, fire!" The man "who had fought five hundred battles for France, not once against her, was shot as a traitor" because of his love for Napoleon.

Mrs. Hens, a bride at Exeter, Eng. was attended to the altar by her large white building Bob, who wore a wedding favor.

FOR TREASURER.
To the Voters of Elizabeth City
County:
I shall be a candidate for treasurer
of the county in the general election
to be held on Tuesday, November 4,
and I will appreciate most cordially
your support. I am not running as
a candidate of any political party,
clique or organization, but shall submit
my claims to the people, believing
that it is the voters who must decide
who shall serve them in their
offices of trust. Seventeen years in
the office gave me a training that
certainly fits me for the position, and
if I am again elected to the position
it will be my aim to treat all of the
people as I did while in office.
JESSE S. JONES.
